Coseyfire Elegance 5Kw With Log Store

Clean Burn Contemporary Woodburning Stove- 2 Year Guarantee

About the Range. This advanced range of high quality contemporary steel stoves has been carefully designed by the Coseyfire team to offer great value stylish products for a fraction of the price. We offer 4 different styles, 5kw with or with out stand and 8kw with or with out stand. All units are made from high quality steel and professionally welded with full CE and British standard data plate.

This listing is for the the 5kw version with log store.

Unique features of the range. The stoves base does not exceed 100c and is stated so on the data plate. In turn this means the stove can be fitted directly onto a 12mm hearth (Very important for free standing installations). Extra large log retainer. It is a common question asked whether we can supply taller log guards, so on this unit we have incorporated a chunkier and taller log retainer to prevent fuel falling out of the stove. At the same time we also designed a very durable new multi-fuel grate mechanism. Fixed secondary/clean burn system at the rear. This sucks in air from the rear passes it over the fire and helps to re-burn the initial smoke produced by the fire. This makes the stove very efficient and eco friendly. This system is usually seen on a lot more expensive stoves and will save you a fortune on fuel over the years.

Guarantee

2 year guarantee

(This covers the stoves body and not the internal perishable parts like grates and fire bricks.) Guarantee is activated when the stove is invoiced. 6 digit number on the top of each invoice is the warranty number.

For stove to be covered it must be installed by a HETAS engineer.

Overnight Burn The Coseyfire range has an excellent overnight burn system. Its air tight door gaskets and manually controlled air flow controls allow you to close the stove right down overnight and wake up to a warm house in the morning. All you will need to do is reopen the air controls, add a little coal or wood and watch the fire roar again.

Stove Features

- Heat Output : **5Kw**
-
