Coseyfire Petit XL 8kw - RED ENAMEL
Multi-Fuel Woodburning Stove

Brand:Coseyfire

Product Code: Coseyfire Petit XL Red

Coseyfire Petit XL 8kw - RED ENAMEL

Multi-Fuel Woodburning Stove

About the Stove

This unit has been designed by our brand Coseyfire and incorporates an advanced pre-heated secondary burn system which ensures a clean and efficient burn. This stove is wonderfully hand constructed and blends traditional styling and modern efficiency. The Petit XL is made from thick mineral cast iron, and is designed to stand the test of time. It's clean lines make it suitable for a wide range of decor, styles and tastes. The Petit XL is a multi-fuel stove that will deliver a reliable source of heat with an accurate degree of control. Controlled by the secondary airflow lever and the chrome spin dial on the door, you will find the Petit XL is not only easy to use but a joy to use too.

Why choose this stove? Many thousands have been spent on designing and testing this unit. It has been designed with the customer in mind so that they are getting a great stove with impressive features for the best price. It's features include a sizeable fire box which can take a large log, it has an easy to clean heat resistant finish, smooth air controls and a 5" flue outlet. The unique Petit XL is finished in a lovely Red enamel that looks stunning. We are offering a chance to own a product that is unique and a little different than the standard black stove. The finish is not only good to look at it is also very practical. Standard stoves can get very shabby after time with dust and dirt building up clinging to the stove. With an enamel stove this is not an issue as they can just wipe clean with a cloth.

Clean Burn System

The Coseyfire Petit has an advanced tertiary clean burn system that is controlled by a chrome pull lever on the base of the stove. This lever opens and closes a vent that pulls air over the fire, re burning the initial smoke emitted by the stove. This makes the stove a lot more efficient and eco friendly saving you a large amount on fuel costs.

Guarantee

12 month guarantee

(This covers the stove's body and not the internal perishable parts like grates and fire bricks.) Guarantee is activated when the stove is invoiced. 6 digit number on the top of each invoice is the warranty number. For stove to be covered it must be installed by a HETAS engineer.

Overnight Burn

The Coseyfire Petit XL has an excellent overnight burn system. It's air tight door gaskets and manual air flow controls allow you to close the stove right down overnight and wake up to a warm house in the morning. All you will need to do is reopen the air controls, add a little more coal or wood and watch the fire roar again.

Stove Features

- ★ Heat Output : 8Kw
- ★ Pre-heated airwash system: Yes
- ★ Outlet : 5" (125mm) top and rear

- ★ Bits and bobs : Ash pan tool, Oven glove, Ash pan, Full manual
- ★ Baffle plate : Yes
- ★ Spare parts available : Yes
- ★ 90 KG

Stove Construction

Body - The stove is made from thick Australian cast iron allowing the stove to radiate heat for much longer than stoves with thinner castings. The stove is also made entirely from mineral cast iron as opposed to re-melted scrap like many others. This makes the stove much more durable and drastically reduces its chances of cracking in the future.

Grate - Cast iron multi-fuel grate for wood and smokeless coal

Firebricks- Both sides lined with vermiculite bricks and the back with cast iron plate.

Why Are We So Cheap?

This is a common question we get asked and understand why people will sometimes wonder how it can be done so cheap. We design a large amount of our products and they come direct from our factory to us. This completely cuts out any middle men. We can stock over 2500 stoves at any one time and ship direct to the end user with no showrooms. We always suggest prospective buyers take a look at our glowing feedback that currently has over 7000 positive comments on our stoves and stove products.

Had this stove for 10 months now - fitted January 17. Used it for last winter and have just had the first couple of burns recently. A great stove. The red enamel is a brilliant look, very different from the standard black stoves. It takes a bit of practice to get the right burn - just enough flame without eating logs like no tomorrow. I've found having the vents fully open to start and getting a roaring fire to burn up the first logs makes a good bed of hot coals. Then dial the vents right down, the circular one on the front almost fully closed and it burns nice and steady. Not tried an overnight burn yet, but I guess it would have to be a hefty sized log to achieve this. Size is good, look is amazing. I'm currently doing the kitchen diner up at the minute and am eyeing up the 16kw double sided one. I will certainly use stoveworld again.

Excellent product and exceptional value for money.

The stove itself burns a treat and does stay in all night and it produces a good heating effect. This stove in use meant that the electric night storage heaters could be turned off both downstairs and upstairs. Very easy to light and operate. I have used both coal and seasoned wood in it and it burns extremely well with both. Mine is the wine red colour and it looks stunning.

Now onto the service I received from Stove World. The fire was delivered to my bolt hole in rural Devon in a couple of days of placing the order online. On unpacking it there was some damage to the enamelling on the base caused by the screws on the packaging crate. There was no other damage. On contacting Stove World and sending them a couple of pictures they arranged for the stove to be collected and a new replacement sent within two days at their expense. There were no problems with the second one. I received excellent service, and it was really nice talking to the lady I dealt with on the phone, very professional and customer focused. I will be purchasing another one of these stoves from Stove World in the next few months for the other building on my property. Thank you for great service and a great fire at a really great price.
