Coseyfire Woodsman 7kw Multi-Fuel Woodburning Stove

About the Stove

This 7kw traditional cast iron stove has a large combustion chamber that can be filled with sizeable seasoned logs or smokeless coal. The grate is solid and allows good air flow under the grate.

A special feature of the Woodsman is its separate ash pan door. This allows extra air flow through the stove to aid in lighting and also means the ash pan can be cleaned whilst the fire is burning.

We are so confident of this products quality we offer a 100% no questions asked returns policy. Just send it back and you will receive a full refund for the stove, excluding shipping fees

Overnight Burn

The Coseyfire woodsman has an excellent overnight burn system. Its air tight door gaskets and manually controlled air flow controls allow you to close the stove right down overnight and wake up to a warm house in the morning. All you will need to do is reopen the air controls, add a little coal or wood and watch the fire roar again. A top air control allows the air to be directed down the glass to keep it clean and add secondary air to complete combustion for a more efficient stove.

Never thought I would ever say my living room would be to hot, by far the best money ever spent. I would urge anyone who has a big livingroom with an open coal fire to change to one of these stoves, less fuel and less mess. Would highly recommend and great efficient service from company. ★ ★ ★ ★ ★
