Dome Outdoor Pizza Oven

Stainless Steel, Stone Base

Product Code: Dome Oven

Dome Outdoor Pizza Oven

Stainless Steel, Stone Base

About the 60kg Cove Dome

Stone bake Italian style pizzas and other food with The Dome, by Cove Outdoor.

The Dome is lined with 1mm 201 stainless steel and has a fully insulated fire retardant core and stone base. This vital for a pizza oven as retains the heat for hours at a stable temperature, allowing you to keep cooking for long periods of time, perfect for large families or parties.

When you are finally done cooking and the oven cools down it can be wheeled away easily and covered over. The Dome also includes two side shelves perfect for condiments or serving up the pizzas.

The oven itself is 700mm Deep by 410mm Wide and 270mm High and can fit a sizeable pizza or anything you fancy cooking in the oven; its uses are endless.

The advantage of the stone base is the heat stored in these stones is transferred directly through the pizza or bread that lays directly on it.

The oven is also perfect for cooking other dishes including lasagna and casserole.

If you are smoking foods in the oven, the stainless steel chimney has a damper/choke that can completely cut the supply of air off.

- ★ Height : 1520mm
- ★ Width: 1000mm (Including side shelves)
- ★ Depth : 860mm
- ★ Weight : 70kg
- ★ Cooking chamber : 410mm x 700mm x 270mm

- ★ **Note: Fitted Covers, Pizza Paddles and Brushes sold on the website but not included.**

Why Are We So Cheap?

This is a very common question and the answer is simple: this pizza oven is designed by our team, constructed in our factory and distributed directly from us to you. We are also an internet-based company with no showroom, so all of these factors combined means we can offer a fantastic pizza oven at a very good price.

Important Information

PLEASE READ - The Green Machine outdoor pizza oven comes with a temperature gauge above the top oven. We have found this "smokes up" and gets very dirty and difficult to read, We are asking people to keep this in mind before buying and not rely on this gauge - we suggest a hand help temperature gun like [this one on eBay](#) - they are a lot more accurate and reliable.

My partner bought me the Cove Pizza Oven as a birthday gift it's amazing so easy to put together tested it out with homemade pizza first which was amazing followed by roast chicken the following day which was amazing, as others have said the thermometer thing on the door is a Total waste of time it was blackened after first use to the point you can't read it didn't matter to me as I had an infra red one which is much more accurate so I rely on that instead they really need to come up with something to stop them going black or change the design to something better, as others have said it is low to the ground and could be higher on the stand saves a lot of bending down I wheel my oven out in front of my arbour seat which is the perfect height for seeing Into the oven and taking things in and out of the oven but not every one may have that option this oven is very well made apart from the temp gauge on the door and the food it cooks is fab

I've had the oven for a year and am still glad we bought it. Fantastic quality and the price is a steal. It's low as previous comments but that means it's not to bulky when not in use. Fantastic pizzas and everyone enjoys making their own. It costs more in wood than the ingredients so all really cheap to make. Pizzas cook so quickly it takes a while to get the knack of not burning the crust. All part of the fun learning.

 *All stoves and accessories delivered in two to three days.*
