Hampton 5 - Black, Defra Approved

Brand: Hampton Collection
Product Code: HAMP

The Defra Approved Hampton 5 is one of the most up to date and cleanest wood burning stoves sold in the UK. It has been tested and approved to meet the new Ecodesign requirements that will be mandatory for all stoves by 2022, making this a stove for now and for the future.

This model not only meets but exceeds the government's tough requirements by some distance; many stoves do not pass the test at all. All test results have been carried out by Kiwa Gastec in Cheltenham, UK - a leader in their field.

The Technology

The Hampton 5 boasts some of the lowest combined readings of NOx, CO and dust of any wood burning stove sold in the UK. In response to the government's initiatives to lower such emissions from wood burning stoves, you can rest assured that you have one of the cleanest stoves for sale in the UK. This unrivalled clean burn has been achieved by the quality engineering exhibited in all Hampton models. All bodies are made from thick steel plate that is perfectly folded and welded together, ensuring no air can leak into the stove.

We confidently offer a 7 year warranty on this product.

Crystal Clear Glass

The air is drawn into the fire low down at the stoves rear. The air races up and over the stoves chamber increasing in speed as it travels until it is unveiled and drops like a curtain over the stoves glass. This system is proven to be a very effective way of keeping the glass clean and clear of smoke stains providing the wood burnt is well seasoned.

Optional Extras

This unit comes with two optional extras. The first being a heat shield that reduces the distances to combustibles from 375mm to 300mm, perfect for free standing installs. The second is a vertical rear flue box that makes certain installations a lot easier and also gives the user a perfectly flat top, perfect for cooking.

7 Year Guarantee

This covers the stove's body and not the internal perishable parts like grates and fire bricks. Guarantee is activated when the stove is invoiced. 6 digit number on the top of each invoice is the warranty number. For stove to be covered it must be installed by a HETAS engineer or signed off by building control.

DEFRA Approved

The Hampton has been rigorously tested and approved to burn wood in a smoke controlled zones. Defra approved stoves with 5" flue outlets, like this one, can also be installed with a 5" liner.
