Orion Circular 7-10kw
Woodburning Multi-Fuel Stove

Brand:Zona
Product Code: Orion

Orion Circular 7-10kw Woodburning Multi-Fuel Stove

About the Stove

The stove's key feature has to be the curved heat resistant glass that brings the fire to life and offers a view of the fire from all angles. Its fully cylindrical body makes the stove appealing from anywhere in a room and is a key reason why this style of design is so popular with free-standing installations. The stove's dark grey finish is complimented by the chrome handles and the air sliders finish the stove off perfectly.

Construction - Made entirely from Thyssen steel and weighing 122kg, this high quality stove is not only great to look at but is designed to last. The stove has a magnetic log store door that allows you to hide away logs to maintain the sleek, contemporary appearance. This unique feature provides a little extra warmth to the logs before they are burnt, ensuring they're dry and ready to burn. Inside the fire you will find a virgin ore cast iron grate which is perfect for burning wood and smokeless coal. This grate is surrounded by a stone base and has a deep removable ash pan below. The sides and top are lined with vermiculite firebricks to keep the heat inside the fire and to protect the stove body. Due to the stove's huge curved door, there is a large space in front of the fire which acts as an ash lip preventing ash from dropping out of the fire onto the hearth.

How it works - The Orion has a simple catch handle that's easy to use and simple to replace if it ever was to need replacing. Primary air into the stove is controlled by the slide vent on the door. This channels air under the fire. The secondary burn and airwash system is controlled by a pull out lever under the fire. This reignites the flame high up in the chamber and helps to keep the glass clean and clear.

Clean Burn System

The advanced secondary/tertiary clean burn system takes in air from the rear and feeds it under and over the fire and over the glass to help keep it clean. The secondary burn feature re-burns the initial gasses and smoke produced from the fire, saving you money on fuel.

1 Year Guarantee

(This covers the stove's body and not the internal perishable parts like grates and fire bricks.) Guarantee is activated when the stove is invoiced. 6 digit number on the top of each invoice is the warranty number. For stove to be covered it must be installed by a HETAS engineer or signed off by building control.

Overnight Burn

The Orion has an excellent overnight burn system. Its air tight door gaskets and manually controlled air flow controls allow you to close the stove right down overnight and wake up to a warm house in the morning. All you will need to do is reopen the air controls, add a little wood and watch the fire roar again.

Stove Features

- ★ Large German Schott curved glass front
- ★ Tight locking doors with chrome handles.
- ★ Top flue outlet - 140mm - Euro adapter required to step upto 150mm (6") <http://www.ewingfamily.co.uk/stove-flue-pipes/stove-ma-adapter-euro-inch>

Why Are We So Cheap?

This is a common question we get asked and understand why people will sometimes wonder how it can be done so cheap. We design a large amount of our products through other branches of our company "Ecosy+" in this case and they come direct from our factory to us: this completely cuts out any middle men. We can stock over 2500 stoves at any one time and ship direct to the end user with no showrooms. We always suggest prospective buyers take a look at our glowing feedback that currently has over 7000 positive comments on our stoves and stove products.
