

- ☆ Top quality wood burning stoves direct to you at trade prices.
- ☆ Speedy delivery. ☆ Long guarantees. ☆ Hundreds of 5 star reviews.

Ottawa 12kw

DEFRA APPROVED, 5 YEAR GUARANTEE

Brand:Ottawa

Product Code: Ecosy+ Ottawa 12kw DEFRA

### About the Stove

We have recently had the Ottawa 12kw wood burning stove put through rigorous CE and smoke control tests here in the UK at Kiwa Gastec. We are glad to say the stove has passed with flying colours!

This version of the Ottawa 12kw is Defra approved and supplied without a stand. Also available: [Defra-approved version with stand](#) and [non-Defra version without stand](#)

Due to the Ottawa 12kw's new tertiary air system it is running at over 76% efficient. This will save you a lot of money over the years. To top it off, Ottawa 12kw stove has also passed a tough DIN+ particle test that will soon be required for all stoves in the UK. This stove is completely future-proofed and an absolute bargain at the price.

### Defra Approved

This Defra-approved version of the Ottawa 12kw has been rigorously tested and approved to burn wood and smokeless coal in a smoke controlled zone. Fitted with a mechanical stop to prevent secondary air closure beyond the 31mm open position. When ordering over the phone please specify that you require the Defra version. If not you may be sent the non-Defra unit.

### 5 Year Guarantee

This covers the stove's body and not the internal perishable parts like grates and fire bricks. Guarantee is activated when the stove is invoiced. 6 digit number on the top of each invoice is the warranty number. For stove to be covered it must be installed by a HETAS engineer.

### Clean Burn

The Ottawa 12kw stove has an advanced clean secondary burn system that is controlled by a chrome lever on the base of the stove. This lever opens and closes a vent that pulls air over the fire, re-burning the smoke. This makes the stove a lot more efficient and eco-friendly, saving you a large amount in fuel costs.

### Stove Features

**Heat Output** : 12Kw

### Stove Construction

**Body** - 10mm thick steel top and 5mm thick steel plate sides.

**Grate** - Includes a virgin ore cast iron ash riddling grate

**Fire brick** - Stone

### Why is a mechanical stop added?

This is to prevent full closing down of the stove. A fully closed down stove burns less efficiently, emitting more smoke particles. This addition combats that issue and allows it to be installed in smoke control areas.

### Why Are We So Cheap?

This is a common question we get asked and understand why people will sometimes wonder how we can sell a 12kw Defra-approved wood burning stove so much more cheaply than other companies. We design a large amount of our products and they come direct from our factory to us. This completely cuts out any middle men. We can stock over 2,500 wood burning stoves at any one time and ship direct to the end user with no showrooms. We always suggest prospective buyers take a look at our glowing feedback that currently has over 7,000 positive comments on our stoves and stove products.

Ottawa 12kw

This stove is very well made, great quality and even better value for money. Being an interior designer, I love the modern styling and more contemporary look of this stove.

I searched many stove makes and this is by far the best stove I found at much less than half the price of other makes. Incredibly happy with my purchase.

22/11/2015

I'm delighted with this stove. My requirement was for an economical but efficient log burner that I could transport to Greece for local installation.

Using advice from the stovefitters outlet it was installed to UK safety standards (not local Greek ones!) and commissioned using the instructions. Results are amazing. Great air control, excellent burn (the ash is powder not granular which is a great sign)

Plenty of heat thrown out to warm up an open plan 120 Sq. M house with stair well and mostly concrete/tile construction. Highly recommend this stove is in your short list. It doesn't have colours, swivel, cylinders, tv format or pedestals.....but it doesn't cost £3,000+ either! It works, is efficient and looks very contemporary without shouting out "look at me I'm expensive". Very satisfied customer.
