Brand: Ottawa

Product Code: Ecosy+ Ottawa 5kw -DEFRA

Ottawa 5kw Multi-Fuel

5 Year Guarantee, DEFRA Approved, 80% efficient

About the Ecosy+ Ottawa 5

This Ecosy+ brand is designed and built by Stove World and is available only from us and a few carefully-selected stockists and installers. The Ottawa is an industry respected stove that has an advanced secondary burn system that has helped it pass the tough Defra requirements. This wood burning / multi-fuel stove is wonderfully hand constructed and blends traditional styling with modern efficiency. The Ottawa is a hybrid stove with a thick steel body and virgin cast door. Designed to stand the test of time, its clean lines make it suitable for a wide range of decor, styles and tastes. The stove is a multi-fuel model that will deliver a reliable source of heat with an accurate degree of control whether you are burning dry seasoned wood or smokeless coal.

DEFRA Approved

This particular unit has been put through rigorous CE and smoke control tests here in the UK at Kiwa Gastec. We are proud to say the stove has passed with flying colours and, due to the stove's new secondary air system, it is running at over 80% efficient - a figure higher than most stoves sold in the UK. This will save the user a lot of money over the years. To top it off the stove has also passed a tough DIN+ particle test further proving it is a clean burning unit built for the demands of modern wood burning.

This version of the Ottawa 5 has been approved to burn wood and smokeless coal in a smoke controlled zone. It has been fitted with a mechanical stop to prevent secondary air closure beyond the 31mm open position. A 5" flue liner can be fitted onto this stove. Also available at a lower cost: the [non-Defra version of the Ottawa 5kw](#).

Clean Burn System and additional air

As mentioned above, the Ottawa 5 has an advanced clean burn system. This system works by drawing in air from the stove's base and filtering it over the fire bed. The addition of extra air over the fire is a proven way of burning off the initial smoke produced by the fire before it is released up the chimney. This system is not only beneficial to the environment but it is beneficial to you too. This system increases the stove's efficiency and an increased efficiency means less fuel will be consumed by the fire, saving you time, effort and money. In addition to this, the stove has an up to date air wash system that filters air over the glass helping to keep this clean and clear.

Guarantee

5 year guarantee

(This covers the stove's body and not the internal perishable parts like glass, grate and fire bricks.) Guarantee is activated when the stove is invoiced. 6 digit number on the top of each invoice is the warranty number. For stove to be covered it must be installed by a HETAS engineer.

Ray 13/03/2020

Ordered and received the Ottawa 5 Defra Stove and was fitted in the revised fire place and what a little beauty it is, well built and looks great we adhered to the break in instruction and now working fantastic, for a small multi fuel stove it pumps the heat out, brilliant stove and worth every penny.

Sarah Morris 03/02/2020

We had a large fireplace to fill and wanted something a little different. We are over the moon with the way it looks. We use the oven for roasting chestnuts and warming bread the house smells delicious.

I ordered this over Christmas and it arrived within 3 days. I received a great service and can't recommend it enough. (Pictures uploaded to gallery by SW)

tosh 08/01/2020

6 months plus usage of this stove now, its on every day, no faults at all, haven't replaced any internal parts, all still very good considering constant usage, only burning seasoned and kiln dried woods. Have all the spares, internal from stove world for when I need them including stove glass.

Using stove thermometer to keep things right.

Hope this helps if you are wanting this stove, its a little cracker for the price.

Tony, Tosh
