- ☆ Speedy delivery. ☆ Long guarantees. ☆ Hundreds of 5 star reviews.

### Purefire Curve 5kw

DEFRA APPROVED, 85% efficient, Contemporary Woodburning Stove - 5 Year Guarantee

Brand: Purefire

Product Code: Ecosy + Purefire Curve SE

### About the Stove

This stove proves there really is no need to spend £700+ to get an advanced, good quality stove. Some of the features on this stove include a huge fully heat resistant glass fronted door that gives an amazing view of the fire. The stove is a fully welded construction that includes a 5mm thick body and 10mm thick top. We are so confident of its quality that we offer a 5 year guarantee; something that is not offered on any other stove around this price bracket.

This stove has tucked away air controls under the bottom ash lip to allow for bigger glass size and a maximised view of the fire. It's advanced design makes the stove adaptable for a "direct air feed" which is perfect for new homes. - **Note: On a standard install you will not require a direct air feed kit or an air brick installed in the room for this stove. This will only apply for new builds.**

This version of the 5kw Curve is Defra approved. Also available, at a lower cost, the [non-Defra version of the Ecosy+ 5kw Curve](#).

### DEFRA Approved

We have recently had the stove put through rigorous CE and smoke control tests here in the UK at Kiwa Gastec. The stove has passed with flying colours and due to the stove's new tertiary air system it is running at over 85% efficient. To top it off the stove has also passed a tough DIN+ particle test that will soon be required for all stoves in the UK. This stove is completely future proofed and an absolute bargain at the price advertised.

This version of the 5kw Curve has been rigorously tested and approved to burn wood and smokeless coal in a smoke controlled zone. When ordering over the phone please specify that you require the DEFRA version.

### Clean Burn System

The advanced secondary/tertiary clean burn system takes in air from the rear and feeds it under and over the fire and over the glass to help keep it clean. The secondary burn feature re-burns the initial gasses and smoke produced from the fire, saving you money on fuel.

### 5 Year Guarantee

(This covers the stove's body and not the internal perishable parts like grates and fire bricks.) Guarantee is activated when the stove is invoiced. 6 digit number on the top of each invoice is the warranty number. For stove to be covered it must be installed by a HETAS engineer.

### Stove Features

- ★ 125mm 5" top and rear flue collar included.
- ★ Glass - 340mm X 225mm
- ★ Internal stove dimensions - H: 220mm W: 295mm D: 230mm

### Stove Construction

**Body** - 10mm thick steel top and 5mm thick steel plate sides.

**Grate** - Includes a virgin ore cast iron ash riddling grate

**Fire brick** - Stone

### Why is a mechanical stop added?

This is to prevent full closing down of the stove. A fully closed down stove burns less efficiently, emitting more smoke particles. This addition combats that issue and allows it to be installed in smoke control areas.

### Why Are We So Cheap?

This is a common question we get asked and understand why people will sometimes wonder how it can be done so cheap. We design a large amount of our products and they come direct from our factory to us. This completely cuts out any middle men. We can stock over 2500 stoves at any one time and ship direct to the end user with no showrooms. We always suggest prospective buyers take a look at our glowing feedback that currently has over 7000 positive comments on our stoves and stove products.

# Purefire Curve 5kw

DEFRA APPROVED, 85% efficient, Contemporary Woodburning Stove - 5 Year Guarantee

Bought this back in Feb 18 this yr & was fabulous for the beast from the east cold weather. Never had a stove before but can state the flame pattern & performance from this is excellent. Ordered stove, 904 liner, chimney pot, ma adapter & vitreous enamel flue pipe, you will get fantastic heat from what appeared to be a small stove to me looking forward to winter now! Don't hesitate to buy if uncertain vs dearer brands as quality product without extra expense.

Great stove probably the best value on the market. Great heat output large window and well built.

We have fitted lots and only ever get great reviews from our customers. Lovely looking stove that has been well designed and a lot of thought has gone into design too.
