Defra Approved, Eco Design Ready, Slimline

Brand: Panoramic

Product Code: Slimline 5kw With Stand

Ecosy+ Panoramic 5kw - With Stand

Defra Approved, Eco Design Ready, Slimline

2022 Eco Design Ready

This stove is one of the most up to date stoves on the market. It has been tested and approved to meet the new Eco Design requirements that will be mandatory for all stoves by 2022, making this stove for now and the future. These test results have been approved by **HETAS** and listed on their official website.

About

This stove has a huge, fully heat-resistant, glass-fronted door that gives an amazing view of the fire. The stove's air supply is solely drawn in from the rear and regulated by the sliding control on the front. This advanced design makes the stove adaptable for a "direct air feed" which is perfect for new homes. Note: this will only apply for new builds.

This stove answers a lot of customers' problems - they need a physically large wood only stove but can only install one with a 5kw output. Cleverly, the external body is very wide (560mm) but the depth of the stove is shallow (314mm) so this can be achieved. The inner layer has also been tapered in at the sides, but the firebox is still 400mm wide meaning large logs are not a problem. The stand is specially designed for this particular stove and leveling points to ensure the stand does not rock on the hearth.

Clean Burn System

This stove has an advanced secondary/tertiary clean burn system. The secondary burn feature is a real advantage as this re-burns the initial gasses and smoke produced from the fire. This means you are getting every drop of heat from your fuel and in turn will save you filling the stove up as often, saving you money and time on fuel.

5 Year Guarantee

This covers the stove's body and not the internal perishable parts. Guarantee is activated when the stove is invoiced. 6 digit number on the top of each invoice is the warranty number. For stove to be covered it must be installed by a HETAS engineer or signed off by building control.

Stove Features

03/04/2019

I ordered this stove as soon as the business reopened after Christmas. Whilst it was out of stock, I received it within a week and the delivery driver gave me notice to get home from work for delivery (I am close to home). The stove itself has been installed today and is outstanding. Only small fires lit at this stage but the control is very effective at controlling the burn rate. My installer was so impressed with it he has enquired about stocking these models in his own showroom as he could not believe the quality for the price !
