Brand: Purefire
Product Code: Slimline 5kw

Purefire Panoramic Slimline

5Kw Ecodesign Ready wood burning Stove - 5 Year Guarantee

2022 Eco Design Ready

The 5kw Ecosy+ Purefire Panoramic Slimline is one of the most up to date stoves on the market. It has been tested and approved to meet the new Eco Design requirements that will be mandatory for all stoves by 2022, making this stove for now and the future. Find out more about the Eco Design scheme at stoveindustryalliance.com.

Slimline

This stove answers a lot of customers' problems - they need a physically large wood only stove but can only install one with a 5kw output. Cleverly, the external body is very wide (560mm) but the depth of the stove is shallow (314mm) so this can be achieved. The inner layer has also been tapered in at the sides, but the firebox is still 400mm wide meaning large logs are not a problem.

This version is not Defra-approved. [Defra-approved version](#) also available.

About

This advanced wood burning stove, suitable for a 12mm hearth, has been tested at KIWA Gastec in Cheltenham to CE and British standards along with the new ERP testings for Eco Design.

This stove has a sleek aesthetic with tucked away air controls which allows for larger glass size and a maximised view of the fire. The stove's air supply is drawn in from the rear and regulated by the sliding control on the front. This advanced design makes the stove adaptable for a "direct air feed" which is perfect for new homes. The dimensions of this outlet are 90mm internal diameter and 100mm external diameter. Currently we do not offer any direct air feed kits but these can be found on-line from many retailers.

Note - On a standard install you will not require a direct air feed kit or an air brick installed in the room for this stove.

This will only apply for new builds.

Clean Burn System

The advanced secondary/tertiary clean burn system takes in air from the rear and feeds it under and over the fire and over the glass to help keep it clean. The secondary burn feature re-burns the initial gasses and smoke produced from the fire, saving you money on fuel.

5 Year Guarantee

We are so confident of its quality that we offer a 5 year guarantee. (This covers the stove's body and not the internal perishable parts like grates and fire bricks). Guarantee is activated when the stove is invoiced. 6 digit number on the top of each invoice is the warranty number. For stove to be covered it must be installed by a HETAS engineer or signed off by building control.

Why Are We So Cheap?

We design a large amount of our products and they come direct from our factory to us. This completely cuts out any middle men. We can stock over 2,500 stoves at any one time and ship direct to the end user with no showrooms. We always suggest prospective buyers take a look at our glowing feedback that currently has over 7,000 positive comments on our stoves and stove products.

Overnight Burn

The Ecosy+ Panoramic Slimline has an excellent overnight burn system. Its airtight door gaskets and manually-controlled air flow controls allow you to close the stove right down overnight and wake up to a warm house in the morning. All you will need to do is reopen the air controls, add a little wood and watch the fire roar again.
